Exploring the Mind & Brain

Harvard Medical School, Boston, Massachusetts, USA

Inside Looks are brief, low-cost, power-packed events that capture the very best of member access.

Exploring the Mind & Brain

Harvard Medical School ~ 25-27 October 2006

To bring you this Inside Look, your host **Bill Morton** has created a partnership with Harvard Medical School and leading faculty from prominent US and world institutions. With these experts, you'll participate in lecture and lab settings, side-by-side with Harvard medical students.

Whether your family includes young children with developing minds, or you wonder why you are occasionally forgetful, this Inside Look gives you valuable insight into what goes right in the brain, and what happens when things go wrong. The fascinating new research on the development, function and repair of the brain is valuable and pertinent to all CEOers.

This exclusive program is open to only 50 participants and gives you a deep understanding of how the brain develops and functions and the latest technologies to repair it.

This event is waitlisted.

Registration is now open. For information, visit www.ceo.org or contact CEO Senior Education Manager Leah Romero at 301.280.2546; lromero@ceo.org.
